Estimated Material Cost Per Lineal Foot Worksheet

You Should Know

This is a guideline only. It should be used as a reference and as an aid in selling Bufftech fence.

Formula

- For Residential fence styles, select post installation method.
Estimate lineal footage cost of that installation method = A.
- A x total length of fence needed (include gate area if using kit).
Round lineal footage up to the nearest full section based upon either 6' or 8' centers (center depends on style of fence) = B.
Example: 100' (13 full sections plus 2' 6" remains) on 8' center is rounded to 105' (14 full sections).
- B + cost of gate(s) = C.
- C = Estimated cost of material.
Be sure to add an ending post and any gate posts required.

Post & Rail Fence Estimated Price Per Foot

The following is a guide for approximate MATERIAL COST per lineal foot of Bufftech Fence.

(Based on rails, 5 in. x 5 in. posts, internal post caps and lock rings needed to build fence on 8 ft. centers — 6 ft. centers for blend colors — you will need to add an ending post and any gates required.)

	2 Rail (68 in. Post)	3 Rail (84 in. Post)	4 Rail (96 in. Post)
Top Rail Height:	36"	54"	60"
1-1/2" x 5-1/2" Ribbed Rails	\$_____ per ft.	\$_____ per ft.	\$_____ per ft.
2" x 6" Ribbed Rails	-	\$_____ per ft.	\$_____ per ft.
2" x 6" with CertaGrain Texture (Arctic Blend, Brazilian Blend, Sierra Blend, Weathered Blend)	\$_____ per ft.	\$_____ per ft.	\$_____ per ft.
1-1/2" x 5-1/2" with CertaGrain Texture	\$_____ per ft.	\$_____ per ft.	\$_____ per ft.

Crossbuck (84 in. Post)

Top Rail Height:	54"
1-1/2" x 5-1/2" Ribbed Top & Bottom Rails	
1-1/2" x 5-1/2" Ribbed Cross Rails	\$_____ per ft.

Gate Kits (Large or Small Rail):	<u>2 Rail</u>	<u>3 Rail</u>	<u>4 Rail</u>
8 ft. Width	\$_____	\$_____	\$_____
Small Rail with CertaGrain Texture	\$_____	\$_____	\$_____
Large Rail with CertaGrain Texture	\$_____	\$_____	\$_____

Crossbuck

8 ft. Width	\$_____
-------------	---------

Look for these icons throughout the brochure on products that meet special performance requirements.

WINDZONE™ PERFORMANCE

Miami-Dade County-approved NOA for exceptional performance in high wind conditions. To comply with Windzone Performance, additional items are needed for installation.

NOA # 20-0303.02 expires 03/13/2024

NOA # 20-0303.01 expires 04/04/2023 (molded)

MEETS POOL CODE

Styles that meet most local building codes for use around pools (applies to 4', 5' and 6' heights only). Check with your local building code official as local codes may vary.

Residential Fence Estimated Price Per Foot Worksheet

THE FOLLOWING IS A GUIDE FOR APPROXIMATE MATERIAL COST PER LINEAL FOOT OF BUFFTECH FENCE. ESTIMATED PRICE PER FOOT - BASED ON (1) IN-GROUND POST, (1) UNASSEMBLED FENCE SECTION, (1) FLAT CAP (GOTHIC CAP USED WHERE NOTED). DIVIDED BY 8 FOR 8' CENTER SECTIONS & DIVIDED BY 6 FOR 6' CENTER SECTIONS.

71320	Wall mount w/ no plate for 1-1/2" use with 1-1/2" x 5-1/2" or for 1-1/2" x 1-1/2" accent fence rails.	-	-	1-1/4"	1-1/4"	1-1/8"
71321	Wall mount w/ plate for 1-1/2" x 1-1/2" use for 1-1/2" x 1-1/2" accent rails.	2-1/2"	2-1/2"	1-1/4"	1-1/4"	1-1/8"

WALL MOUNT BRACKET W/ PLATE

Use with plate between 2 stationary objects when a vinyl post cannot be installed (i.e. between 2 brick pillars).

WALL MOUNT BRACKET W/ NO PLATE

Use wall mount bracket with no plate when attaching fence or railing to a wall and running into a vinyl post.

Note: Not all profiles are available in all colors. Call for color availability and order requirements.

The routing template is primarily for use in the field. The kits contain a number of templates that allow the installer to rout a variety of holes that will accept the fence or railing profiles.

This system is ideal for situations which require stepping or racking, as well as transitions from one height or style to another.

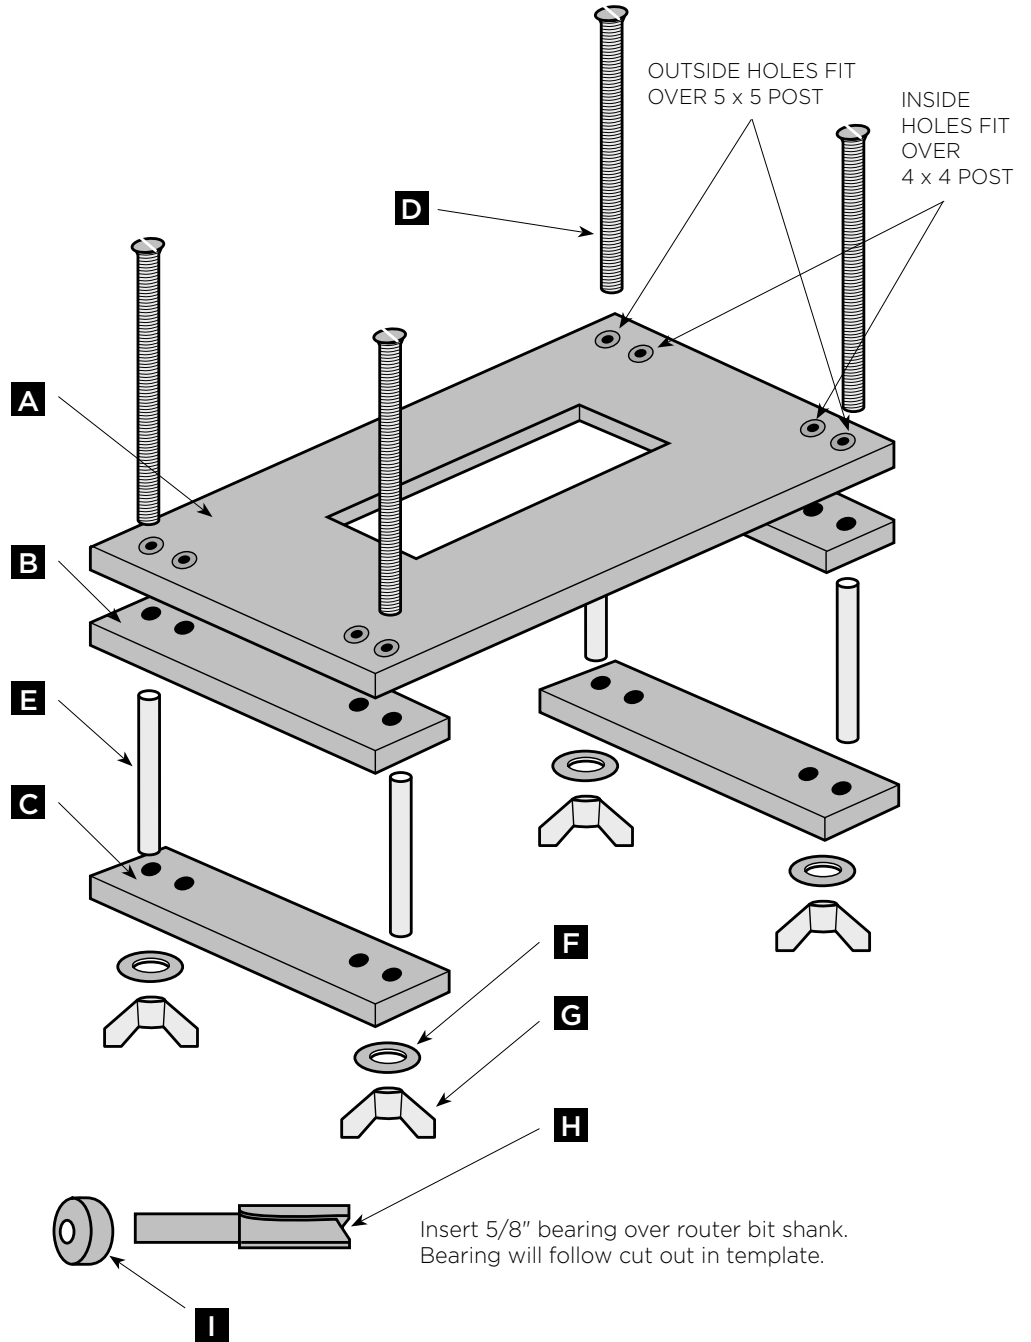

In addition to the template kit, either a fixed base or a plunge router is required. The plunge router will require a 5/8" router template guide (purchase from your local tool dealer).

The fixed base router will require a 5/8" bearing (supplied in the template kit).

CAUTION!
Follow manufacturer's recommendations for safe operating procedures.

Important!
Routing templates have been specifically designed to be used with either a 5/8" bearing (fixed base router), or a 5/8" template guide (plunge router) and a 3/8" router blade with a 1/4" shank.

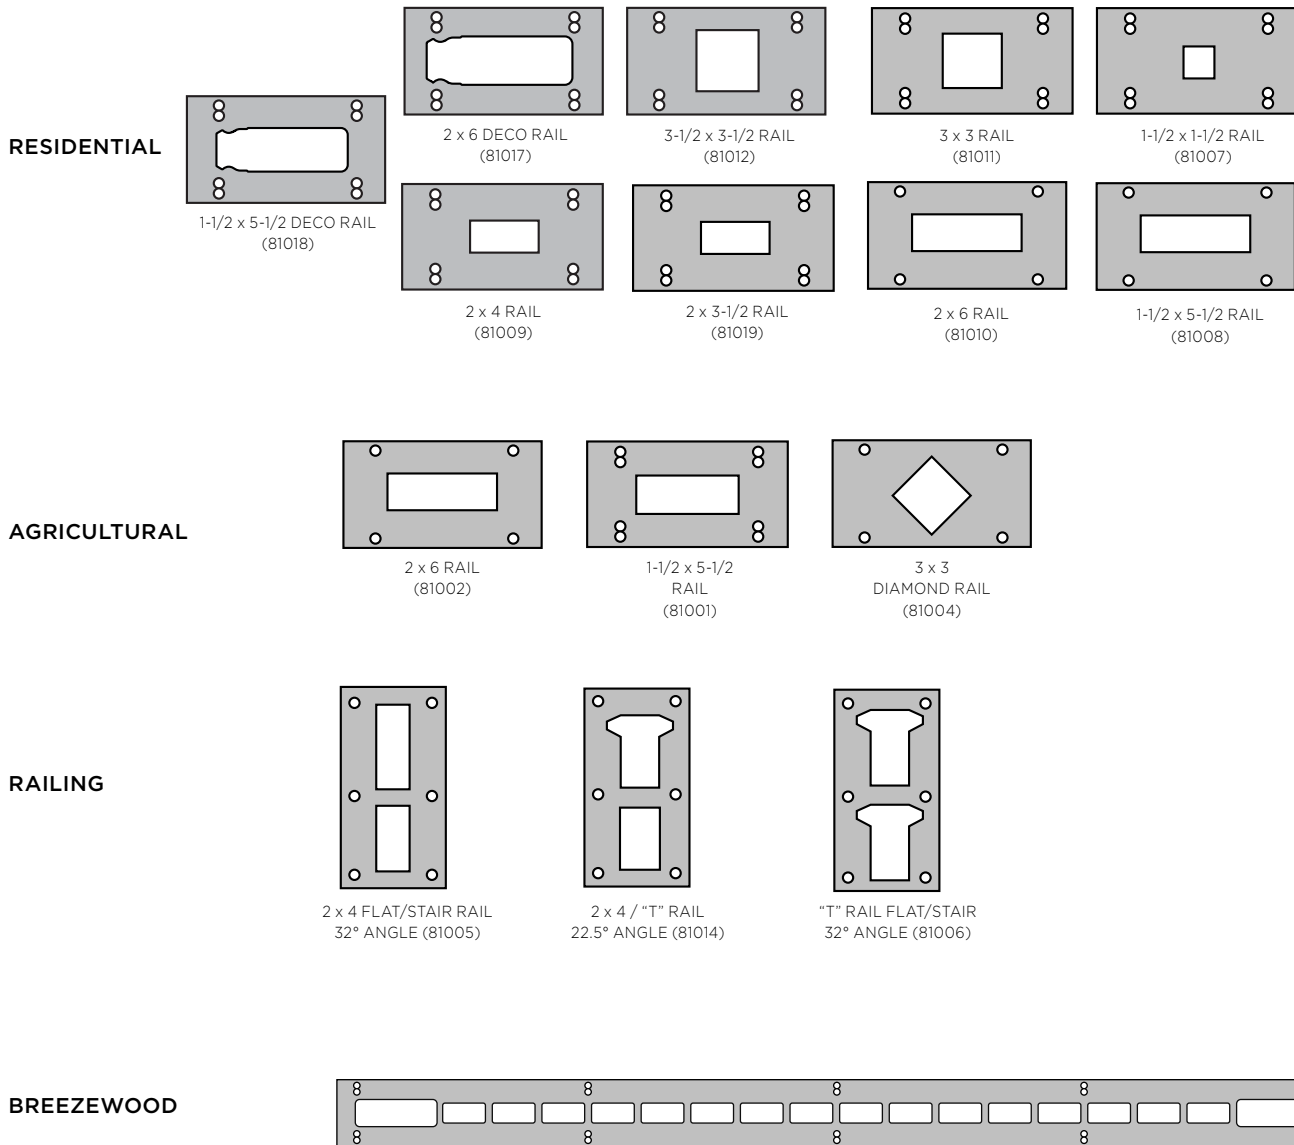

Any substitutions may result in an improper hole size or corner radius that could adversely affect the fit between the rail and post.

- A** ROUTING TEMPLATE
- B** 1-1/8" TEMPLATE SPACER PLATE
- C** 1-1/2" TEMPLATE SPACER PLATE
- D** 1/4" -20 x 6" BOLTS

- I** 5/8" BEARING W/ 1/4" ID OPENING

QUANTITY	PRODUCT NUMBER	DESCRIPTION
_____	81041	Complete Routing Kit Package
_____	81044	Residential Routing Kit (9 black templates)
_____	81042	Agricultural Routing Kit (4 white templates)
_____	81063	Breezewood Template Kit (1 black template)

Note: Each template cut is designed to be 1/8 in. larger than the finished cut. This is to allow the template guide or bearing to follow the shape of the cut. Each kit comes in a carrying case suitable for field use.

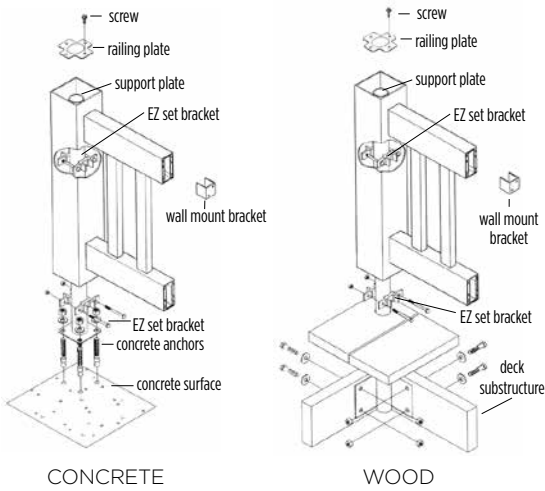

Each template cut out is designed to be 1/8" larger than the finished cut. This is to allow the template guide or bearing to follow the shape of the cut out.

Each kit comes in a carrying case suitable for field use

20' deck plank available in pallet quantity only as part of a full or 1/2 truckload of Bufftech products.

Can be scored & cut to form L-channel for trim

Estimated Material Cost Per Lineal Foot

You Should Know

This is a guideline only. It should be used as a reference and as an aid in selling CertainTeed EverNew Decking.

Formula

1. Calculate square footage of surface to cover with deck plank.
2. Multiply square footage x 2.18 to determine linear feet of **deck plank** required.
3. Multiply linear feet of plank x 2 to determine linear feet of **fill piece** required.
4. Measure linear footage of open ended plank to determine linear feet of **end cover** required.

DECK LAYOUT

SPECIAL NOTES

- For quote purposes only, 12' or 16' planks are used.
- Decking must be laid in the opposite direction or diagonally to the direction of the joists.
- Deck screws required approx. 1-1/2 per linear foot and are sold in 100/pack.
- Standard deck screws are galvanized. Please specify if stainless are desired.
- Fill pieces required are 2 per length plank.
- End covers are quoted for exposed cut edges only.
- End cover fasteners required are 1 per linear foot of end cover.
