

**Water Supply System  
for Use with Multi-Matic™  
and Volu-Matic® V**

The Multi-Tank™ is a professional grade, 250-gallon water supply system. Designed for use with the Multi-Matic Wall Spray Machine, the Multi-Tank is also available in a model compatible with the Volu-Matic V and other machines capable of spray applied applications. When paired with the Multi-Matic a hydraulic oil cooler is fitted to increase machine component life.

The Multi-Tank is heated and insulated for better performance and added dependability in cold climates. The pump, pump motor, supply hose and fill hose are all located within the tank enclosure to prevent freezing. Power to the Multi-Tank is supplied by the 10,000 kW generator equipped standard on the Multi-Matic and available on the Volu-Matic V. An external power hook-up is provided for use with appropriate site power.

**Features & Benefits**

- Stainless steel insulated holding tank
- 150 ft. water supply hose
- 25 ft. water fill hose
- Hose storage reel (supply)
- Built-in water pump and drive motor
- Thermostatically controlled heating element
- Removable insulated access doors
- Adjustable drive belt
- Electrical overload protection
- Integrated safety features
- Internal baffles to minimize slosh load
- Corrosion-resistant valves and fittings
- System strainers with serviceable mesh screens

**Multi-Tank™  
Water Supply System**

**Two Models Available**

- Multi-Matic Compatible
- Volu-Matic V Compatible

**Specifications**

- Height: 63.5"
- Width: 24"
- Depth: 88"
- Weight: Approx. 1,200 lbs.

# Multi-Tank™ Water Supply System

Machine Works

## Feature Details

**HEATED AND INSULATED TANK** – Offers protection from cold environments.

**INTEGRATED SAFETY FEATURES** – Equipped with GFCI, heavy-duty electrical components and drive belt guard.

**ADJUSTABLE DRIVE BELT** – Special belt-tightening screws make it easy to keep the belt properly tensioned.

**REMOVABLE INSULATED ACCESS DOORS** – Allows easy access to pump and fill compartments.

**CORROSION-RESISTANT HARDWARE** – Valves, fittings and serviceable system strainers ensure clean water to the spray nozzle.

**INTERNAL BAFFLES** - Designed to minimize slosh loads while adding structural strength.

**OVERFILL PROTECTION** – Internal plumbing protects from overfilling.

**HEATER INDICATOR LIGHTS** – Confirms power to the heating element and when element is activated.

**DUAL POWER MODES** – Accepts power input from spray machine and equipped with external power hook-up.

CertainTeed Machine Works offers a comprehensive line of commercial and residential insulation and fireproofing application equipment, including blowing machines, spray foam systems, vacuums and accessories. We provide equipment installation, troubleshooting and repair; custom machine design services; and same-day shipping of spare parts, Graco spray components and Dynasolve cleaning products.
