Echelon™ Frame and Panel System

The Echelon ceiling system combines large-format acoustical panels with a precise, narrow framework. The fine extruded grid cleanly defines perimeters and penetrations. Panels offered in white, a wide range of custom colors, and mass-customized designs.

GRID: KEY FEATURES

- Grid available in clear anodized, black & white finish
- Clean and simple integration with lighting, diffusers, and other subsystems
- Easy installation – self-squaring elements ensure exact positioning
- Support for versatile grid spacings

PANELS: KEY FEATURES

- Sizes up to 4' x 6'
- Excellent acoustical performance – NRC=0.85 and SAA=0.86
- Panels available in hundreds of matched colors and a range of wood finishes, as well as custom textures/designs
- Lightweight, resilient panels use up to 50% less material than traditional sound-absorbing materials
- Formaldehyde-free, GREENGUARD GOLD certified
