

# Installation on Sloping Terrain 8'

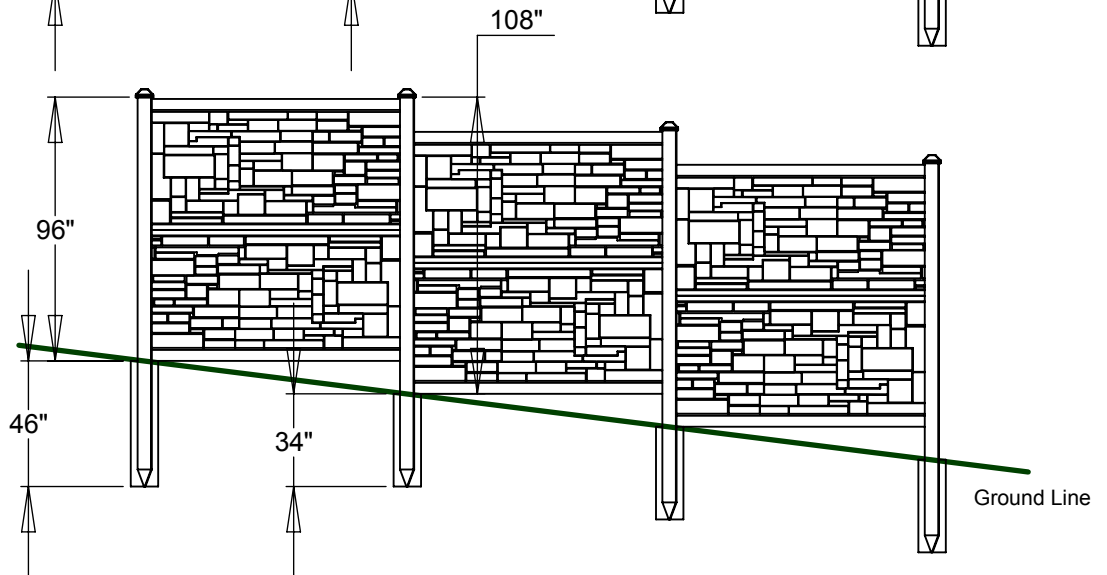

## No Gap

The highest point of a stepped panel can be buried to eliminate a gap. This will reduce the height of the fence at the highest point.

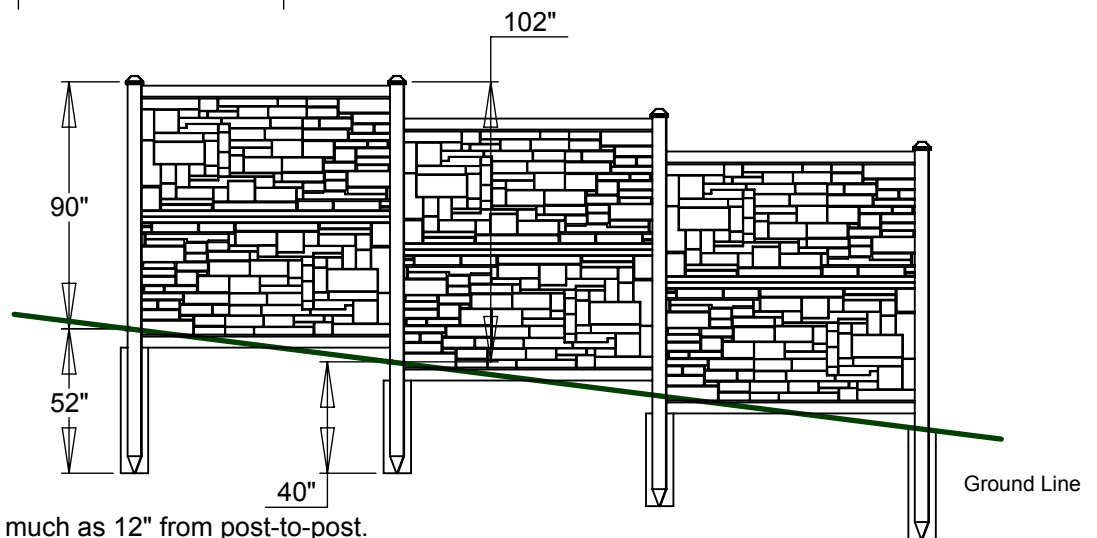

## Gap

The highest point of a stepped panel can be set at ground level. This will leave a growing gap from post-to-post.

## Small Gap

The highest point of a stepped panel can be partially buried to minimize the gap. This will reduce the height of the fence at the highest point by a few inches.

### Notes:

- 1) A panel can be stepped as much as 12" from post-to-post.
- 2) SimTek Fence is not engineered to be used as a retaining wall.
