

# COMPLETE COVERAGE FOR YOUR ROOF

Warranty coverage for your roof and solar system  
from a leader in building products

## SOLAR INSTALLED WITH A NEW ROOF JUST MAKES SENSE

Most solar systems come with a 25-year warranty and may last longer than that. But if your roof is more than 5 years old, there's a good chance that it won't last as long as your solar system. Having to remove and re-install your solar system so that you can replace your roof is expensive.

Installing a typical solar system involves poking a few dozen holes in your roof. It's critical that your current roof, the flashing for your solar attachments and your solar installer are up to the task.

## COMPLETE COVERAGE FOR YOUR ROOF

When you combine a CertainTeed roof with a CertainTeed solar system, you get complete coverage for your roof. No finger pointing, no chasing down multiple warranty providers, just one solid company standing behind both your roofing and solar products. Ask your local installer about adding warranty coverage on the professional installation of both your roof and solar system to wrap your roof in the most comprehensive warranty available.
