REDEFINING WHAT'S POSSIBLE
WITH PANELS

▶ Techstyle® Acoustical Ceilings & Walls

SAINT-GOBAIN

Take panels further than you thought possible

Go bigger and bolder than ever before with Techstyle® Acoustical ceilings and wall systems for a level of durable performance and design freedom you never imagined.

TECHSTYLE ACOUSTICAL PANELS FEATURE:

- An exceptionally smooth surface for a premium look in an array of vivid colors, wood looks, felt and custom finishes
- Unconventionally large format panels - up to 4' x 8' - are standard and require no special orders or extra lead times
- Lightweight, sag-resistant fiberglass construction that remains flat, even in high-moisture applications
- Exceptional sound absorption - NRC up to 0.85 with no acoustical backer needed
- Convenient swing-down panels attach directly to standard 15/16" suspension systems enabling easy plenum access and a semi-concealed visual

No matter if you choose **White**, **Wood**, **Color**, **Felt**, or **Custom**, Techstyle will change the way you design ceilings.

Largest ceiling panels in the industry

Design with individual lay-in panels up to 32 sq. ft. and swing-down panels up to 24 sq. ft. in a variety of width and length combinations.

STANDARD LAY-IN SIZES

WIDTHS (fixed)	STANDARD LENGTHS (custom lengths available upon request)
24"	24" / 48" / 60" / 72" / 96" / 144"
30"	24" / 30" / 48" / 60" / 72" / 96" / 144"
48"	24" / 48" / 60" / 72" / 96"

STANDARD SWING-DOWN SIZES

WIDTHS (fixed)	STANDARD LENGTHS (custom lengths available upon request)
24"	6" / 24" / 48" / 60" / 72" / 96"
30"	6" / 24" / 30" / 48" / 60" / 72" / 96"
48"	6" / 24" / 48" / 60" / 72"

Unique construction

The extraordinary features of Techstyle® ceilings and walls all stem from its unique construction. Comprised primarily of fiberglass, the panel's channeled honeycomb interior delivers incredible performance benefits, while the exterior is an ultra-smooth fabric surface with a premium appearance that elevates any design.

Unmatched Performance

High quality surface. Smooth, non-woven polyester fabric holds color, resists scratches, and stays beautiful.

Sag-resistant and durable. Flexible and resilient, even our largest panels remain smooth and flat, unaffected by moisture and resistant to surface and corner damage.

Highly sound absorbent. Techstyle panels absorb both high and low frequencies at an impressive level, with NRC of up to 0.85 and CAC 17 with no backer.

Lightweight and simple to install and maintain. At just 0.30 lbs./sq. ft., Techstyle panels are remarkably easy to handle and keep clean.

GREENGUARD Gold Certified*

One panel structure. Thousands of design possibilities.

There's more to Techstyle than typical wall-to-wall grid installations. A full range of trim products enables the same basic panel structure to take on countless creative forms.

CUSTOM SOLUTIONS WITH TECHSTYLE CEILING

- Direct mount to walls or ceilings to boost design impact and acoustic performance
- Design islands and floating clouds to serve as visual focal points and add acoustic control in open spaces
- Create curves, waves, and other shapes for an unexpected sense of motion

Versatile installation options

Techstyle® ceilings and walls are available in two different panel styles, both compatible with 15/16" EZ Stab Suspension Systems. Each accommodates a different installation method and results in a different overall aesthetic.

Whatever installation you choose, Techstyle panels are Class A fire-rated according to ASTM E84 and GREENGUARD Gold Certified formaldehyde-free.

Lay-In Panels are designed to rest in a suspension system like a typical trim-edged acoustical ceiling tile, creating an exposed grid look.

Swing-Down Panels are designed with a special clip that attaches to the suspension system creating a semi-concealed visual. The panels can detach to swing-down on one side, offering downward access to the plenum.

SIMPLIFIED SUSPENSION CHOICES

For ease and convenience, Techstyle is available with CertainTeed 15/16" EZ Stab suspension systems.

Techstyle panels are also compatible with the **Techstyle Grid System (Echelon)**, which features the thinnest visible grid lines available.

Easy access and fixture integration

Techstyle makes it easy to install and integrate lighting and diffusers with designated fixture trim options. Compatible lights and diffusers can be found on our website at - certainteed.com/techstyle

Swing-down panels attach to the grid and suspend 1-1/8" below

TRIM OPTIONS

A wide variety of trim profiles are available, enabling everything from direct mounting and wall mounting to floating clouds and island installations, as well as fixture integration.

DIRECT MOUNT		WALL TRIMS		FIXTURE TRIMS	
DM3 NARROW	DM2 WALL	WT1	WT2	FIXTURE TRIM FLANGE	FIXTURE TRIM REVEAL
<p>wall application only</p>					
FLOATING TRIMS					
FT2	FT3	FT4	FT6	FT8	FT2A
