

Celotex — The Very Best™

LIMITED WARRANTY

The Celotex Corporation ("Celotex"), warrants to the first consumer owner ("Owner") that its family of residential asphalt shingles will remain free from manufacturing defects during the warranty period shown below. In addition to the material defect Limited Warranty, Celotex warrants that those shingles designated as Fungus Resistant (FRS™), will remain free from algae and fungus growth which adversely affect overall appearance of the shingles for a period of ten (10) years.

Remedy — First Year

During the first twelve (12) months of the warranty, Celotex will repair or replace defective shingles only up to the original cost of the shingles, plus labor to install the shingles (not to exceed the original labor cost). Celotex will not pay costs to tear off or dispose of defective shingle flashings, metal or related work are not included.

Remedy — Balance of Warranty

For the balance of the warranty, the repair or replacement cost which Celotex will pay will be reduced by the amount of use received from the shingles. Celotex will pay a percentage of the reasonable roofing repair or replacement cost, not to exceed the original cost of shingles and labor, calculated by dividing the reasonable costs by the ratio of the number of months remaining in the warranty to the number of months in the original warranty period. Celotex will not pay costs to tear off or dispose of defective shingles.

Remedy — FRS™ Shingles

During the ten (10) year warranty period for the FRS shingles, Celotex will pay to repair or replace defective shingles based on the amount of use received from the shingle not to exceed the original cost of shingles and labor. In the initial five (5) years, Celotex reserves the right to clean the fungus from the shingles rather than to repair or replace them.

Wind Damage

Celotex warrants that its shingles will resist wind blow-off damage due to wind velocities, including gusts, up to a maximum of sixty (60) m.p.h. during the initial 5 year (60 month) period. All self-sealing shingles must be subjected to warm sunlight for several days before full thermal bonding can occur. Shingles installed in Fall or Winter may not seal until the following Spring. Failure to adhere these circumstances is not a manufacturing defect and Celotex will not be responsible for wind damage until such thermal bonding has occurred.

Celotex will be liable only for the reasonable cost of replacing blown off or wind damaged shingles and manually sealing any remaining unsealed shingles. Celotex reserves the right to repair or replace only those shingles affected.
