

InsulSafe® SP Blown-in Sidewall Insulation

InsulSafe® SP Blown-in Sidewall Insulation

FIBERGLASS INSULATION—FAST AND EFFECTIVE

Protect your home with proven InsulSafe SP blown-in sidewall insulation from CertainTeed. Seamless installation ensures InsulSafe SP provides outstanding thermal efficiency—and energy savings—for the life of the home.

Using a patented process, InsulSafe SP is held in place by netting, enabling it to fill cavities completely.

THERMALLY EFFICIENT AND COST-EFFECTIVE

InsulSafe SP blown-in sidewall insulation provides higher R-values in typical sidewall applications. When installed at recommended density levels, it yields an R-15 in 2" x 4" construction and an R-24 in 2" x 6" construction.

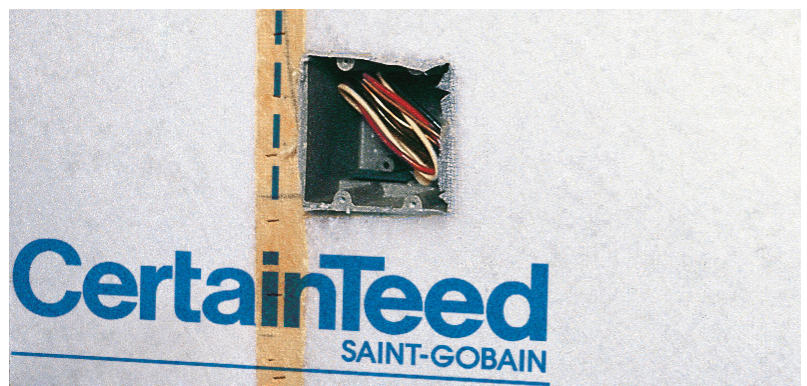

A CUSTOM-FIT BLANKET

What distinguishes InsulSafe SP is its custom-fit seamless blanket, providing outstanding thermal performance in irregular-shaped cavities and around obstructions.

FILLS VOIDS

Tests show that even a small gap in an insulated cavity can cause a substantial increase in heating and cooling costs. InsulSafe SP makes it easier for installers to provide a superior insulation job with no voids around wires, electrical boxes, or pipes. Odd-sized framing assemblies? No problem. With InsulSafe SP, there's no cutting or fitting required. The absence of voids means you're assured full R-value for exceptional thermal efficiency.

InsulSafe SP completely surrounds electrical boxes to help prevent costly drafts and cold spots.

Blown-in InsulSafe SP provides a continuous thermal barrier around water pipes and delivers outstanding acoustic control.

EXCELLENT SOUND CONTROL

By filling all voids and gaps, blown-in InsulSafe SP blown-in sidewall insulation significantly reduces unwanted sounds from ventilation systems, appliances, televisions, stereos, and teenagers. Installing it around pipes and plumbing fixtures helps decrease the noise of running water. It's ideal for master bedroom suites, bathrooms, home offices, and entertainment rooms.

IT WON'T SETTLE

When installed at required densities, InsulSafe SP will not settle or separate, and that means the insulation will maintain its thermal efficiency for the life of the home.

IT'S SUSTAINABLE

InsulSafe SP is manufactured by CertainTeed, a company committed to sustainable building practices and a member of the United States Green Building Council (USGBC). The product is manufactured with no formaldehyde and is GREENGUARD® Gold Certified for superior indoor air quality.

VERSATILE AND DEPENDABLE

InsulSafe SP is the right choice for these applications:

- New construction
- Remodeling projects
- Attics, sidewalls, and floors
- Metal framing
- Sound control

INSULSAFE® SP DELIVERS

- Excellent coverage
- Thermal efficiency
- Noncombustible
- Won't settle
- Lasts for the life of a home
- Sustainable energy efficiency
- Gold Certified
- Noncorrosive
- Won't rot or decay
- Excellent sound control
- Won't absorb moisture or support fungus growth
- Lifetime limited warranty
- Formaldehyde-free, no added dyes or acrylics

With seamless installation and custom fit in cavities — and around potential obstructions — InsulSafe SP provides homeowners an exceptional level of thermal comfort.

CertainTeed offers interior and exterior building solutions backed by experience, collaboration and innovation. Our comprehensive, multiproduct solutions optimize building efficiency while creating desirable environments in which people can thrive. We are here for you. Let's make beautiful spaces together.
